

## The Comfort Efficiency & Expertise You Should Expect

Since 1971, family owned and operated Lansing Heating & Air Conditioning Inc. has been taking care of families in the Chicagoland and Northwest Indiana region. Our motto has and always will be let our family take care of your family. We do so by carrying industry leading Carrier/Bryant equipment. We have been installing Carrier products for over 37 years. We know it is important to not only believe in our product but that the Carrier Corporation that provides us with those products believes in us also. We do so by being a Factory Authorized Dealer since the program's inception in 2003. A Factory Authorized Dealer assures that the homeowner/business owner is getting not only the best equipment, but the most highly trained personnel in the industry being held to a higher standard than other manufacturers. Our technicians are NATE certified. We carry an A+ rating with the Better Business Bureau. We do service all makes and models of residential and commercial gas heating, electric heating, hydronic heating, electric air conditioning and all indoor air quality equipment. In keeping with our motto, we seek to make our customers the most comfortable while keeping your systems running as efficiently as possible in the most professional manner.

This is done with regular maintenance. The single best way to ensure your system is performing at its peak efficiency and keeping you as comfortable as possible while minimizing your utility bills as much as possible. It also extends the life of your equipment and gives our certified technicians a chance to save you even more by preemptively spotting a component that might fail during extreme weather.

## Annual Contract For Energy Savings (ACES Program)

- 25% off repairs on ACES program equipment
- Improved comfort and efficiency

## Keeping Families Comfortable For Life

I purchased a condominium in Lansing in May 1983. When I asked the seller for the name of the current provider of heating and air condition services, they recommended Lansing Heating and Air Conditioning. I contacted them and requested that they check the system. They suggested some upgrades like adding a humidifier. I ordered the humidifier and it was installed a couple of days later. Their serviceman was courteous and knowledgeable and knew his products, parts, and services. I have continued to use Lansing Heating & Air Conditioning over the past 36 years. I have always been extremely satisfied with their pricing and the high quality of service. I would strongly recommend them to anyone looking for quality service and sales.

- Bill Downs  
Lansing, Illinois

My husband and I have been using Lansing Heating and Air Conditioning since 2010. They replaced our old system with a new Carrier system in 2017. They even relocated our system to accommodate our basement remodel. They saved us a lot of money, and worked closely with us on the logistics. Our NIPSCO bill has decreased significantly since making the upgrade. Todd and his employees couldn't have been more knowledgeable and professional. Thank you for the excellent job!
